

FILMMAKING REFLECTION ASSIGNMENT

TASK: Write a 500 word reflection discussing your role in the film assignment.

Consider the following: (It is not necessary to address every topic, but consider them as you compose your response)

PRE-PRODUCTION

- What role(s) did you play in this assignment (director, cinematographer, editor, actor, scriptwriter)
- Discuss the pre-production process of planning your scenes, shots, and ideas. What role did your teammates play in the initial planning

PRODUCTION

- Describe the camera angles, shots, and movement used during the production. Explain the purpose and why you used them, and how it added to the effect of the film. Be sure to elaborate on your role in this phase. What were some of the challenges you encountered? Did you have to deviate from your original plan? Why? How? How did that affect the end result

POST-PRODUCTION

- What was the post-production process like? What editing software did you use, and what have you learned during this final stage of your assignment? Did you encounter any problems? How did you solve it

OVERALL

- How and to what extent does the finished film resemble the one you had in mind when you first started working on this assignment? Why do you think that is? Did you end up with something you did not expect to end up with? How might you explain that
- What have you learned about the overall filmmaking process, yourself as filmmaker, and how will you approach future assignments with this new knowledge
